VALUE ADDED COMPONENT CAPABILITIES

Optimizing Electronic Components
For Superior Product Performance

What We Do

Logistics Management

We provide a complete array of logistical services for our customers including Forecasting, Warehousing, and Just-In-Time or J.I.T. Programs.

About ISL

Founded in 1975, headquartered in New York, we are an engineering-oriented manufacturer of standard and value-added electronic and electromechanical components. Our 40 years of manufacturing experience and our knowledge of components, is second to none. Our extensive relationships and personnel across the globe, provide our customers with access to a wide variety of products. We service all size OEM manufacturers, providing product design and manufacturing for standard, value-added, obsolete and hard-to-find components.

Industries Served

From Fortune 500 Companies to Start-Ups, ISL Products has developed innovative component solutions for a variety of industries.

Audio/Visual

Healthcare

Security

Industrial Machinery

Robotics

Food Service
Equipment

UV-Germicidal

Automated Retail

Mass Transit

Our Services

We offer complete “plug and play” assemblies which saves our customers both time and money.

We provide tooling and production services for new products.

We can advise on or process safety approval services for our customers as required. We maintain safety approval files with UL, and ETL and have experience dealing with other agencies such as CSA and TUV.
